## Homework set 5 - M341, TuTh 9:30am - 10:45am section, Spring 2021

## Hand in solutions to:

Section 3.1: 1(b,d), 10, 14.
Section 3.2: 1(a,e,f), 2(a), 13.

Problem 1: Compute the determinants of the following matrices:

$$
\begin{aligned}
\mathbf{A} & =\left[\begin{array}{rrr}
1 & 0 & 2 \\
0 & 3 & 0 \\
-1 & 0 & 5
\end{array}\right] \\
\mathbf{B} & =\left[\begin{array}{rrr}
0 & 3 & 0 \\
1 & 0 & 2 \\
-1 & 0 & 5
\end{array}\right] \\
\mathbf{C} & =\left[\begin{array}{rrrr}
1 & 0 & 0 & -1 \\
1 & 1 & 0 & -1 \\
0 & 7 & 3 & 2 \\
1 & 0 & 2 & 3
\end{array}\right] \\
\mathbf{D} & =\left[\begin{array}{rrrrr}
0 & 1 & 0 & 0 & \pi \\
2 & 0 & 0 & 0 & 1 \\
0 & 0 & 3 & 0 & 1 \\
0 & 0 & 0 & 5 & 1 \\
0 & 0 & -6 & 0 & 1
\end{array}\right]
\end{aligned}
$$

Use row operations to drive each matrix to upper triangular form, then use the theorem that says that the determinant of a diagonal matrix is the product of its diagonal entries.

Optional problems: You are strongly encouraged to work these! But do not hand in.
Section 3.1: 12, 15, 16.
Section 3.2: 2(d), 3(a,b), 14, 17.
