Homework set 1 — APPM5450, Spring 2013

From the textbook: 7.1, 7.3, 7.4. Optional: 7.2, 7.5.

**Problem 1:** Suppose that $H$ is a Hilbert space, and that $(\psi_n)_{n=1}^{\infty}$ is an ON-set in $H$. Let $\mathcal{P}$ denote the set of finite linear combinations of elements in $(\psi_n)_{n=1}^{\infty}$. Prove that:

$(\psi_n)_{n=1}^{\infty}$ is a basis for $H \iff \mathcal{P}$ is dense in $H$.

**Problem 2:** Suppose that $f, g \in C(\mathbb{T})$. Prove that:

(a) $f * g \in C(\mathbb{T})$.

(b) $f * g = g * f$.
